Can Order Mgt Help My Business?

You have chosen Episerver Digital Experience Cloud for your eCommerce platform (ECP). A exceptional platform that combines the best of digital commerce and digital marketing. Now to make your omni-channel strategy really work, you need a world-class Order Management System (OMS) to fulfill all the new orders from the Episerver platform. With the right ECP and OMS you have a best-of-breed unified commerce solution that can easily outrun single vendor solutions. It gives your customers the complete buying experience they expect.

Seamlessly connect OrderDynamics' order management system with your Episerver solution to get the advanced features today's shoppers expect.

How does Order Management help? It lets you:

- Drive in-store traffic with options such as Buy Online, Pickup In-Store
- Display store level Inventory Visibility, down to each shelf
- Process returns quickly and effortlessly - to get customers to want to buy again

Combined Power: 5 Reasons Why

Online retail helps you boost revenue and extend your brand. Having an integrated omni-channel presence when selling through multiple channels lets you show real-time inventory and bring order pickups and online order returns to the physical store. It builds the customer experience, and saves you costs.

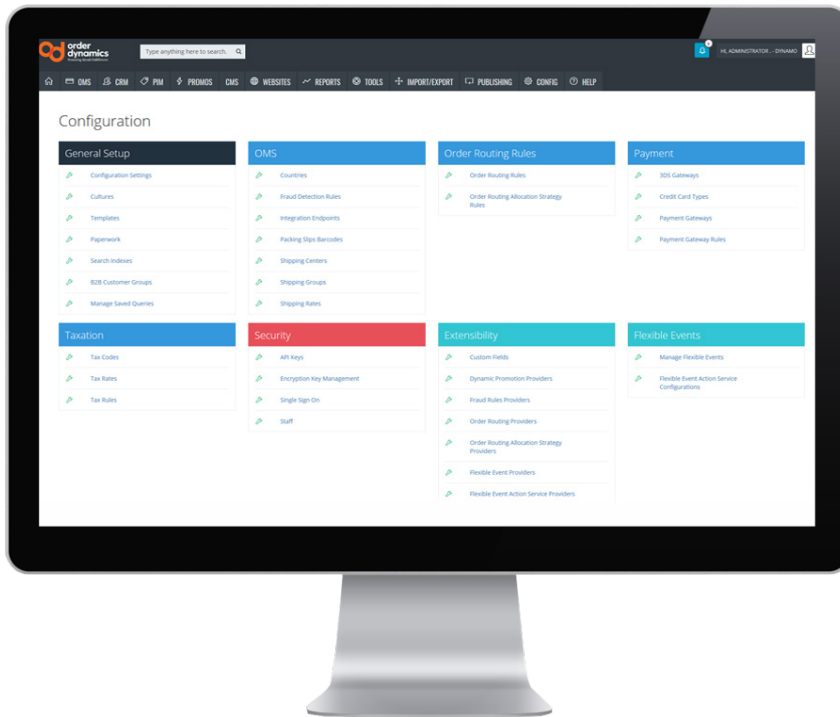

Together Episerver and OrderDynamics:

- Increase foot traffic with instore pickup
- Reduce your risk (proven solutions)
- Grow sales value (25% of extra sales on pickups)
- Improve online sales with real-time Inventory Visibility
- Can scale with your needs (Black Friday, Boxing Day...)

It just makes good business sense. Single vendor solutions don't always have your interests in mind. Episerver is a best-in-class digital commerce solution. OrderDynamics is a best-in-class DOM. Together they tie into your existing systems to provide a flexible, deeply functional, top performance unified commerce system, that outclasses your competition.

Advanced Features You Can Count On

Choosing Episerver Digital Experience Cloud for your online retail presence is a smart move. And choosing a highly robust advanced order management system to seamlessly connect with Episerver, builds an unstoppable system! Combining Episerver and OrderDynamics OMS means you get best-in-class performance, reliability, and massive scalability. Black Friday, Boxing Day, Cyber Monday, Singles Day, any day: our seamless and easily integrated system keeps your shoppers shopping.

Buy & Fulfill Anywhere

Combine Episerver features such as creating user-generated shopable catalogues with the advanced OMS features of OrderDynamics to create an emersive shopping experience.

Extreme Traffic?

No problem. Episerver offers unlimited capacity and elastic scalability. Now add to that the OrderDynamics OMS, proven to handle more than 400,000 orders / hour. Your online order system will handle even the most intense shopping days with ease.

Shipping Rate Brokering

Optimize your retail with the lowest cost shipping option on each and every order shipment. No more standard rates across the board. Giving the best rates to your customers, means they will always come back.

Multi-Lingual/Currency

Retail business doesn't stop at the border. Neither should you. With double character (Chinese, Korean, Japanese), multilingual, and multicurrency support, you are ready to take orders, regardless of geography.

Advanced Order Mgmt

OrderDynamics is a highly advanced, robust, out-of-the-box Order Management solution. Matched with the Episerver platform, you get depth and capacity for an unbeatable unified commerce system.

Fast <90 Day Integration

You need an advanced system that keeps up with your pace. Episerver and OrderDynamics gets you there fast. Get complete integration in as little as 90 days. Ready to go, when you are!
