margin mainly due to higher revenue compared to the first quarter of fiscal 2021. Profit and Adjusted EBITDA¹ were negatively impacted by \$1.0 million related to higher personnel costs (bonus and commissions). See further discussion under Results of Operations for the Second Quarter of Fiscal 2021. Profit was negatively impacted by \$0.5 million due to income tax expense recognized in the second quarter of fiscal 2021 compared to the first quarter of fiscal 2021.

In the first quarter of fiscal 2021, Profit and Adjusted EBITDA² were positively impacted by \$0.8 million resulting from lower operating expenses compared to the fourth quarter of fiscal 2020, mainly due to lower travel costs associated with COVID-19 and lower personnel costs (mainly bonus and commissions). Profit and Adjusted EBITDA² was also positively impacted by \$0.6 million resulting from higher profit margin mainly due higher revenue, lower travel costs and lower bonus costs compared to the fourth quarter of fiscal 2020. See further discussion under Results of Operations for the First Quarter. Profit and Adjusted EBITDA¹ was also positively impacted by \$0.1 million due to foreign exchange gains and losses compared to the fourth quarter of fiscal 2020. Profit was negatively impacted by \$0.7 million due to income tax expense recognized in the first quarter of fiscal 2021 compared to the fourth quarter of fiscal 2020.

In the fourth quarter of fiscal 2020, Adjusted EBITDA² was positively impacted by \$0.4 million resulting from the implementation of International Financial Reporting Standard No. 16 – "Leases". See further discussion under New Accounting Standards adopted during the year in the consolidated financial statements year-ended April 30, 2020.

In the third quarter of fiscal 2020, Adjusted EBITDA² was positively impacted by \$0.3 million resulting from the implementation of International Financial Reporting Standard No. 16 - "Leases". See further discussion under New Accounting Standards adopted during the year in the consolidated financial statements year-ended April 30, 2020.

In the second quarter of fiscal 2020, the Company recorded a \$0.2 million cost for the fair value of contingent consideration to be paid for Tecsys A/S. This change in the fair value of the contingent consideration resulted from strong financial performance of Tecsys A/S that increased contingent consideration expected to be paid to the sellers (Earnout). The Earnout period ended on September 30, 2019 and is the only Earnout period associated with the acquisition. The above amount had a negative impact on Profit and no impact on Adjusted EBITDA² as this item is excluded from Adjusted EBITDA². Adjusted EBITDA² was positively impacted by a quarterly sequential improvement from OrderDynamics, which achieved slightly positive Adjusted EBITDA² in the second quarter of fiscal 2020. Adjusted EBITDA² was also positively impacted by \$0.3 million resulting from the implementation of International Financial Reporting Standard No. 16 - "Leases". See further discussion under New Accounting Standards adopted during the year in the consolidated financial statements year-ended April 30, 2020

In the first quarter of fiscal 2020, the Company recorded \$0.4 million of restructuring costs related to acquisition integration (primarily severance). This had a negative impact on Profit and no impact on Adjusted EBITDA² as this item is excluded from Adjusted EBITDA². Adjusted EBITDA² was positively impacted by \$0.3 million resulting from the implementation of International Financial Reporting Standard No. 16 - "Leases". See further discussion under New Accounting Standards adopted during the year in the consolidated financial statements year-ended April 30, 2020.

In the fourth quarter of fiscal 2019, the Company recorded \$0.5 million of costs related to the acquisitions of OrderDynamics and Tecsys A/S and \$0.1 million related to stock-based compensation expense. This had a negative impact on Profit. Also, included in the fourth quarter of fiscal 2019 is the loss related to OrderDynamics of \$1.1 million. This had a negative \$1.1 million impact on Profit and a negative \$0.9 million impact on Adjusted EBITDA². The total of the above items had a \$1.7 million negative impact on Profit and a \$0.9 million negative impact on Adjusted EBITDA² in the fourth quarter of fiscal 2019. The decline in our organic perpetual license revenue in the fourth quarter was influenced by a shift to SaaS subscription bookings. During the fourth quarter of fiscal 2019, approximately 60% of our software product bookings were SaaS compared to 4% in the fourth quarter of fiscal 2018. This had a material impact on Profit and Adjusted EBITDA² in the fourth quarter as these bookings result in revenue recognition over the coming years (typically five-year contracts recognized ratably) as opposed to up front revenue recognition for perpetual license bookings.

In the third quarter of fiscal 2019, the Company recorded \$0.8 million of costs related to the acquisitions of OrderDynamics and Tecsys A/S and \$0.1 million related to stock-based compensation expense. This had a negative impact on Profit and Comprehensive Loss. Also, included in the third quarter of fiscal 2019 is the loss related to OrderDynamics of \$0.7 million. This had a negative \$0.7 million impact on Profit and Comprehensive Loss and a negative \$0.6 million impact on Adjusted EBITDA². Additionally, the third quarter of fiscal 2019 included non-recurring marketing rebranding program costs of \$0.4 million. Operating activities used \$0.7 million of cash in the first half of fiscal 2021 in comparison to generating \$0.9 million in the first half of fiscal 2020.

Operating activities excluding changes in non-cash working capital items related to operations generated \$4.1 million in the second quarter of fiscal 2021 compared to \$2.4 million in the second quarter of fiscal 2020. The increase is primarily due to higher profitability compared to the second quarter of fiscal 2020. Operating activities excluding changes in non-cash working capital items related to operations generated \$6.8 million in the first half of fiscal 2021 compared to \$3.6 million in the first half of fiscal 2020. The increase is primarily due to higher profitability compared to the first half of fiscal 2020.

Non-cash working capital items used funds of \$4.6 million in the second quarter of fiscal 2021 primarily due to increases of accounts receivable, work in progress and other receivables of \$6.1 million, tax credits of \$0.9 million, inventory of \$0.1 million, partially offset by increases of accounts payable and accrued liabilities of \$0.9 million and deferred revenue of \$1.6 million. Non-cash working capital items used funds of \$7.6 million in the first half of fiscal 2021 primarily due to increases of accounts receivable, work in progress and other receivables of \$5.6 million, tax credits of \$1.7 million, prepaid expenses and contract acquisition costs of \$1.0 million and decrease of accounts payable and accrued liabilities of \$2.9 million, partially offset by an increase in deferred revenue of \$3.6 million.

Non-cash working capital items used funds of \$0.9 million in the second quarter of fiscal 2020 due to an increase in accounts receivable of \$3.1 million and increases in tax credits and prepaid expenses and contract acquisition costs of \$0.8 million offset by increases in accounts payable and accrued liabilities of \$1.8 million and deferred revenue of \$0.8 million. Non-cash working capital items used funds of \$2.7 million in the first half fiscal 2020 primarily due to an increase in accounts receivable of \$1.3 million and increases in tax credits, inventory, prepaid expenses and contract acquisition costs and other receivables totaling \$2.5 million partially offset by a decrease in work in progress of \$0.3 million and an increase in deferred revenue of \$0.4 million and accounts payable and accrued liabilities of \$0.4 million.

The Company believes that funds on hand at October 31, 2020 combined with cash flow from operations and its accessibility to banking facilities will be sufficient to meet its covenants and its needs for working capital, R&D, capital expenditures, and dividends for at least the next twelve months.

Cash flows used in financing activities amounted to \$5.3 million for the first half of fiscal 2021 in comparison to \$2.9 million for the first half of fiscal 2020.

Financing activities in the second quarter and first half of fiscal 2021 related primarily to payment of the CRA liability, repayment of long-term debt and lease obligations as well as interest on long term debt and leases obligations.

During the second quarter of fiscal 2021 and 2020, investing activities used funds of \$0.5 million. During the first half of fiscal 2021, investing activities used funds of \$11.1 million compared to \$0.8 million in the first half of fiscal 2020. As indicated above, during the first quarter of fiscal 2021, the Company invested \$10.0 million in a GIC. The GIC has an interest rate equivalent to the Bank of Canada Overnight Target Rate plus 0.60% and the interest is automatically reinvested monthly.

During the second quarter of fiscal 2021, the Company used funds of \$0.5 million for the acquisition of property and equipment and intangible assets compared to \$0.3 million in the second quarter of fiscal 2020. During the first half of fiscal 2021, the Company used funds of \$1.0 million for the acquisition of property and equipment and intangible assets compared to \$0.5 million in the first half of fiscal 2020.

In the second quarter of fiscal 2021, the Company invested in its proprietary software products with the capitalization of \$0.1 million reflected as deferred development costs compared to \$0.2 million in the second quarter of fiscal 2020. Related Party Transactions

Under the provisions of the executive share purchase plan for key management and other management employees, the Company provided interest-free loans to key management and other management employees of \$0.5 million during the first six months of fiscal 2021 (\$0.7 million for the same period of fiscal 2020) to facilitate their purchase of the Company's common shares. As of October 31, 2020, loans outstanding amounted to \$0.7 million (April 30, 2020 -\$0.5 million).

Subsequent Events

On December 2, 2020, the Company's Board of Directors declared a quarterly dividend of \$0.065 per share to be paid on January 8, 2021 to shareholders of record on December 17, 2020.

Current and Anticipated Impacts of Current Economic Conditions

Current overall economic conditions together with market uncertainty and volatility may have an adverse impact on the demand for the Company's products and services as industry may adjust quickly to exercise caution on capital spending. This uncertainty may impact the Company's revenue.

Based on Annual Recurring Revenue⁶ of \$50.9 million and Professional Services backlog⁶ of \$38.7 million, the Company's management believes that quarterly services revenue (Cloud, Maintenance and Subscription revenue plus Professional Services revenue) ranging between \$24.0 million and \$25.0 million per quarter can be sustained in the short term.

Strategically, the Company continues to focus its efforts on the most likely opportunities within its existing vertical markets and customer base. The Company also currently offers subscription-based licensing, hosting services, modular sales and implementations and enhanced payment terms to promote revenue growth. We see continued market appetite for subscription based SaaS licensing. To the extent our bookings continue to shift from perpetual license to SaaS, revenue and operating profit will be impacted in the medium term and this could be material.

The exchange rate of the U.S. dollar in comparison to the Canadian dollar continues to be an important factor affecting revenues and profitability as the Company generally derives approximately 60% to 70% of its business from U.S. customers while the majority of its cost base is in Canadian dollars.

The Company will continue to adjust its business model to ensure that costs are aligned to its revenue expectations and economic reality to the extent possible.

⁶ Refer to section at end of MD&A titled "Key performance indicators"

The Company believes that funds on hand together with anticipated cash flows from operations, and its accessibility to the operating line of credit will be sufficient to meet all its needs for a least the next twelve months. The Company can further manage its capital structure by adjusting its dividend policy.

COVID-19

On March 11, 2020, the COVID-19 outbreak was declared a pandemic by the World Health Organization, which is causing significant financial market and social dislocation. The Company continues to operate during the current pandemic. The Company is well-equipped to uphold comprehensive support and services for its end-to-end supply chain execution software through its multi-tiered customer care and support teams. Employees continue to work remotely and support Tecsys' customers and partners. Work that was historically done both on site and remotely through telephone and video conferencing, including progressing sales cycles and project implementations, is now supported remotely by its employees. To date, Tecsys' ability to continue to progress sales cycles, sign new orders and execute project implementations has not been affected adversely by the pivot to remote work. Tecsys' end market customer exposure is diverse encompassing a wide range of industries including healthcare, complex distribution and, to a lesser extent, retail. While Tecsys anticipates that some client projects may be postponed or delayed during the pandemic, other client projects are starting up. Based on current activity and considering the Company's significant project backlog, Tecsys believes that this pandemic is not having any material adverse impact on its operating results. Moreover, Tecsys is not currently experiencing or anticipating any material credit losses as a result of the pandemic. Finally, Tecsys does not currently foresee any material adverse impact on the carrying amounts of its intangible assets, including customer relationships and technology, or on the carrying amount of goodwill, as a result of the pandemic.

The Company will continue to monitor developments of the pandemic and continuously assess the pandemic's potential further impact on Tecsys' operations and business. The situation is dynamic, and the ultimate duration and magnitude of the impact of the pandemic on the economy and the financial effect on Tecsys' operations and business are not known at this time. In developing estimates for the six months ended October 31, 2020, management determined that COVID-19 has minimal impact on key assumptions. However, because of the uncertainty that exists, it is not possible to reliably estimate the impact that these developments will have on the Company's financial results, conditions and cash flow.

Outstanding Share Data

As at December 2, 2020, the Company has 14,419,043 common shares outstanding. The company issued 2,500 shares related to the exercise of stock options in the second quarter of fiscal 2021.

Critical Accounting Policies

The Company's critical accounting policies are those that it believes are the most important in determining its financial condition and results. A summary of the Company's significant accounting policies, including the critical accounting policies discussed below, is set out in the notes to the consolidated financial statements and the financial statements for the year ended April 30, 2020.

Critical accounting judgements and key sources of estimation uncertainty

The preparation of the condensed interim consolidated financial statements in accordance with IFRS requires management to make estimates, assumptions, and judgments that affect the application of accounting policies and the reported amounts of assets and liabilities, disclosures of contingent assets and liabilities and recognized amounts of revenue and expenses. Actual results may differ from these estimates.

Reported amounts and note disclosures reflect the overall economic conditions that are most likely to occur and the anticipated measures that management intends to take. Actual results may differ from those estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period, or in the period of revision and future periods if the revision affects both current and future periods.

There have been no significant changes in the key sources of estimation uncertainty and judgements made in relation to the accounting policies applied to those disclosed in the Company's annual consolidated financial statements for the year ended April 30, 2020.

Disclosure Controls and Procedures

Disclosure controls and procedures are designed to provide reasonable assurance that material information is gathered and reported to senior management on a timely basis so that appropriate decisions can be made regarding public disclosure. The Company's Chief Executive Officer (CEO) and its Chief Financial Officer (CFO) are responsible for establishing and maintaining disclosure controls and procedures regarding the communication of information. They are assisted in this responsibility by the Company's Executive Committee, which is composed of members of senior management. Based on the evaluation of the Company's disclosure controls and procedures, the Chief Executive Officer and Chief Financial Officer have concluded that these disclosure controls and procedures were effective as of October 31, 2020.

Internal Control over Financial Reporting

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting to provide reasonable assurance regarding the reliability of the Company's financial reporting and its compliance with IFRS in its consolidated financial statements. The control framework that was designed by the Company's ICFR is in accordance with the framework criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013) (COSO).

No changes to internal controls over financial reporting have come to management's attention during the six months period ending on October 31, 2020 that have materially affected or are reasonably likely to materially affect internal controls over financial reporting.

Although the forward-looking information is based on what the Company believes are reasonable assumptions, current expectations, and estimates, investors are cautioned from placing undue reliance on this information since actual results may vary from the forward-looking information. Non-IFRS Performance Measures

The Company uses certain non-IFRS financial performance measures in its MD&A and other communications which is described in the following section. The non-IFRS measures do not have any standardized meaning prescribed by IFRS and are unlikely to be comparable to similarly titled measures reported by other companies. Readers are cautioned that the disclosure of these metrics is meant to add to, and not to replace, the discussion of financial results determined in accordance with IFRS. Management uses both IFRS and non-IFRS measures when planning, monitoring and evaluating the Company's

performance.

EBITDA and Adjusted EBITDA

The terms and definitions of the non-GAAP measure used in this MD&A and a reconciliation of the non-GAAP measure to the most directly comparable GAAP measure are provided below. These non-GAAP measures do not have any standardized meanings prescribed by IFRS and are therefore unlikely to be comparable to similar measures presented by other companies. Accordingly, they should not be considered in isolation.

EBITDA is calculated as earnings before interest expense, interest income, income taxes, depreciation and amortization. Adjusted EBITDA is calculated as EBITDA before stock-based compensation, fair value adjustment on contingent consideration earnout and restructuring costs. The Company believes that these measures are commonly used by investors and analysts to measure a company's performance, its ability to service debt and to meet other payment obligations, or as a common valuation measurement.

The EBITDA and Adjusted EBITDA calculation for three and six months ended October 31, 2020 and October 31, 2019 derived from IFRS measures in the Company's Consolidated financial statements, is as follows:

	 ree months ed October 31, 2020	 ree months ed October 31, 2019	end	Six months led October 31, 2020	_	Six months ed October 31, 2019

Key Performance Indicators

The Company uses certain key performance indicators in its MD&A and other communications which are described in the following section. These key performance indicators are unlikely to be comparable to similarly titled indicators reported by other companies. Readers are cautioned that the disclosure of these metrics are meant to add to, and not to replace, the discussion of financial results determined in accordance with IFRS. Management uses both IFRS measures and key performance indicators when planning, monitoring and evaluating the Company's performance.

Recurring Revenue

Recurring revenue (also referred to as Annual Recurring Revenue) is defined as the contractually committed purchase of SaaS, proprietary software maintenance, customer support, application hosting, database administration services and third-party maintenance services, over the next twelve months. The quantification assumes that the customer will renew the contractual commitment on a periodic basis as they come up for renewal. This portion of the Company's revenue is predictable and stable.

Bookings

Broadly speaking, bookings refers to the value of accepted contracts. The Company's quantification of bookings is focused on SaaS ARR bookings (the average annual value of committed SaaS recurring revenue at the time of contract signing), perpetual license bookings and Professional Services bookings. The Company believes that these metrics are primary indicators of business performance.

Backlog

Generally, backlog refers to something unfulfilled. In a traditional software company, this term is used largely within finance. Backlog could also refer to the value of contracted or committed revenue that is not yet recognizable due to acceptance criteria, delivery of professional services, or an accounting rule. With the Company's shift to SaaS, our backlog reporting has focused on (a) the natural backlog that is created by Annual Recurring Revenue (annual recurring revenue assuming the customer will renew the contractual commitment on a periodic basis as those commitments come up for renewal) and (b) Professional Services Backlog. The Company has also begun to focus on contracted SaaS backlog as a key performance indicator. The Company enters into SaaS subscription agreements that are typically multi-year performance obligations with original contract terms of three to five years. Contracted SaaS backlog represents revenue that we expect to recognize in the future related to firm performance obligations that are unsatisfied (or partially unsatisfied) at the reporting date.

Days Sales Outstanding (DSO)

Days sales outstanding (DSO) is a measure of the average number of days that a company takes to collect revenue after a sale has been made. The Company's DSO is determined on a quarterly basis and can be calculated by dividing the amount of accounts receivable and work in progress at the end of a quarter by the total value of sales during the same quarter, and multiplying the result by 90 days.

14. Derivative instruments and risk management:

The Company is exposed to currency risk as a certain portion of the Company's revenues and expenses are incurred in U.S. dollars resulting in U.S. dollar denominated accounts receivable and accounts payable and accrued liabilities. In addition, certain of the Company's cash and cash equivalents are denominated in U.S. dollars. These balances are therefore subject to gains or losses due to fluctuations in that currency. The Company may enter into foreign exchange contracts in order to (a) offset the impact of the fluctuation of the U.S. dollar on its U.S. net monetary assets and (b) hedge highly probable future revenue denominated in U.S. dollars. The Company uses derivative financial instruments only for risk management purposes, not for generating trading profits. As such, any change in cash flows associated with derivative instruments is expected to be offset by changes in cash flows related to the net monetary position in the foreign currency and the recognition of highly probable future U.S. denominated revenue and related accounts receivable.
