tecsys ™

Don't just fix your supply chain.
Transform it.

Since our founding in 1983, so much has changed in supply chain technology. But one thing has remained consistent across industries, geographies and decades — by transforming their supply chains, good organizations can become great.

Our solutions and services create clarity from operational complexity with end-to-end supply chain visibility. Our customers reduce operating costs, improve customer service and uncover optimization opportunities.

We believe that visionary organizations should have the opportunity to thrive. And they should not have to sacrifice their core values and principles as they grow. Our approach to supply chain transformation enables growing organizations to realize their aspirations.

Supply chain solutions built for your needs

With decades of supply chain experience and customers in more than 15 countries, we are committed to help good organizations achieve supply chain greatness around the world. **Discover how our solutions will create clarity out of operational complexity.**

Elite™ Enterprise

Equip your supply chain with technology and expertise from Elite™ Enterprise solutions. Our digitally enabled, integrated platform will take your supply chain operations from good to great.

Distribution ERP

With Elite™ Distribution ERP, you can equip your front office workers with automation to seamlessly execute order-to-cash and purchase-to-pay, while significantly heightening service levels to your customers.

Warehouse Management

Elite™ WMS is a visionary, scalable and adaptable solution that addresses the complexity and economic challenges of distribution operations in several industries to help you keep pace with a shifting landscape and move forward confidently.

Transportation Management

Elite™ TMS is an enterprise-class, multi-carrier shipping manifest system that optimizes carrier selection and shipping for outbound small parcels and less than truckload (LTL) freight on several major carriers' shipping solutions. Key order and shipping information flows automatically for unprecedented shipping efficiency.

Delivery Management

Elite™ DM is a powerful end-to-end event tracking and delivery management mobile system for a distribution organization, in-house courier and internal deliveries, including all unattended or unscheduled pickups and deliveries. It enables logistics management from a smartphone and offers real-time traceability comparable to major international parcel shipping organizations.

3PL Billing

Elite™ Billing is a monetizing and billing management tool for a variety of logistics services through innovative pricing and billing models to drive revenue growth and profitability. Automate billing based on transaction type, cycle and owner to accurately monetize, manage services billing, eliminate manual processes and avoid missed billing opportunities.

Point of Use

A dynamic, user-friendly and scalable solution that addresses the just-in-time needs of geographically dispersed supply chains. Elite™ POU helps you gain global visibility and access to inventory anywhere in your distribution network and significantly augment service levels.

Analytics

Elite™ Analytics enables you to gain clear and immediate insight into your organizational data assets in order to make informed decisions. It is easy to implement and use and includes pre-built models such as reports, analyses and dashboards to empower your end users to immediately realize your supply chain performance objectives.

> **We needed to improve our processes and reduce our cost structure in the warehouse and out to our customers. As an outsourced manufacturer and as a wholesaler, we needed to manage both ends of the supply chain spectrum; Purchase-to-Pay (P2P), Order-to-Cash, and certainly everything in between our warehouse operations."**
>
> **Marc Primeau, IT Manager, Walter**

Elite™ Healthcare

Growing your supply chain maturity from operational to strategic to optimized requires Elite™ Healthcare solutions. Our end-to-end supply chain software and technology platform is the industry leader and runs world-class healthcare systems.

Healthcare Supply Chain Management

From receiving on your dock to just-in-time delivery at the patient's bedside and every stage in between, it is critical that you efficiently deliver supplies and packages exactly when they are needed. Elite™ Healthcare SCM's demand planning application empowers your organization to forecast accurately and achieve continuous, just-in-time procurement.

Warehouse Management

Elite™ Healthcare WMS provides the technology backbone required to create a consolidated service center and achieve inventory management and control across your entire network. Our solution enables standardization, system-directed processes and total visibility of inventory to reduce spending and improve service levels with just-in-time delivery of supplies.

Transportation Management

Understand where every package, asset and resource is at all times and achieve the transparency and efficiency of a world-class distribution courier. Elite™ Healthcare TMS allows a health system to ship goods via a common (external) carrier with requisite regulatory requirements.

Delivery Management

Gain chain-of-command visibility, security and reliability throughout your health system's delivery network and the tools to optimize and evolve your logistics activities as your hospital or health system requires. Elite™ Healthcare DM gives you the tools to optimize and evolve your logistics activities within your health system's owned fleet of delivery vehicles.

Point of Use

Track products requiring item-level traceability from receipt into inventory to utilization for a patient. Elite™ Healthcare POU automates the management of critical specialty items used in any procedural areas to eliminate time-consuming, manual processes and provide real-time tracking of product movement and usage across the front line of service.

Pharmacy Inventory Management

Elite™ PIMS enables you to control your pharmacy inventory costs with a centralized supply chain approach. Efficient, automated processes can be deployed throughout your pharmacy supply chain, allowing your system to fully recover avoidable expenses sustained in the management and dispensation of medications, while preserving accuracy and timeliness.

Analytics

Easily monitor and improve your ongoing supply chain performance and case costing with real-time analytics that will help you reduce expenses and recover valuable staff time. Elite™ Healthcare Analytics gives you extensive, accurate utilization and cost data, empowering you to make confident business decisions.

> **The missing piece of the puzzle was a truly consolidated software platform that marries the clinical with the back office, eliminating those performance gaps that exist when one system ends and the next one picks up where that one left off."**
>
> **Betty Jo Rocchio, CRNA, MS**
> **Mercy's Vice President, Perioperative Performance Acceleration**

Omni™ Retail

Power your omnichannel buying experiences with Omni™ Retail solutions. Our scalable platform and integrated solutions help you create seamless shopping experiences for your customers and cost controls for your business.

Order Management

Omni™ OMS is a cloud-native SaaS order management system designed to control the movement of order data and goods between virtual and physical ecosystems, ensuring that both information and product are delivered to the right place and at the right time accurately, efficiently and cost-effectively.

Warehouse Management

Created for e-commerce fulfillment, Omni™ WMS is a cloud-based, scalable and adaptable solution that brings efficiency and speed to your warehouse operations.

Transportation Management

Omni™ TMS increases control over your fleet deliveries and pickups. Automate delivery management and gain visibility into where your drivers and assets are at all times.

Analytics

Omni™ Analytics offers actionable analytics and business insights so you can keep a pulse on your business and visualize trends through clear and concise data.

> "This implementation will enable us to stay at the forefront of omnichannel retail for years to come. Having solid and reliable partners like OSF Digital and Tecsys ensures that we are able to provide our shoppers with exceptional experiences regardless of how they choose to shop with us."
