

# The Benefits of a **Healthcare Supply Chain SaaS Model**

Health systems expect their clinicians to make the smartest, best decisions in the delivery of patient care – and that same expectation should be applied to their supply chain. In today’s world, health systems must have a resilient supply chain that can scale and adapt automatically with elastic technologies and tools that are secure and continuously upgraded to meet the needs of modern healthcare.

**Better decisions require the best model... and that model is in the cloud.**

## Security

With dedicated and segregated environments that are tested and audited to the highest standards, the Tecsys cloud ensures your data is 100% secure.

## Reliability

Equipped with accurate real-time data, your Tecsys analytical tools ensure you’re making strategic and informed decisions for enterprise-wide visibility.

## Performance

Designed to continually improve your end-to-end supply chain control, your Tecsys application can get the right supplies, in the right place, at the right time.

## Scalability

From big to small health systems, the Tecsys platform provides the resources and logistics to maintain balance within your organization.

## Compliance

Stay up to date with DSCSA pharmaceutical regulations by complying with all requirements regarding expiration dates, lot tracking, sales and facility transfers.

## Recovery

Supply chain software is our top priority and your Tecsys solution is prepared to restore your operational performance back to peak efficiency 24/7.
