

Hospital Receiving Workflow

There are a lot of moving parts when it comes to the hospital receiving dock. Implementing a streamlined approach with a single centralized application can simplify operations to easily track and control inbound deliveries.

Manual Receiving Process

Inefficient hospital receiving dock

CHALLENGES

- Broken chain of custody.
- Manual receiving processes with multiple applications.
- Advanced shipping notice (ASN) receipts are not supported.
- Delivery delays and errors.

Tecsys Receiving App Process

Instant visibility into all deliveries

GAINS

- All "specialty" items are tracked and logged accordingly.
- All PO receipts are 3-way matched for accounting purposes.
- Instant visibility into all deliveries to the hospital.
- Accessibility of advanced shipping notice (ASN) receiving from trusted vendors.
