

# 6 Reasons Why OR Nurses Choose Tecsys' Elite™ Healthcare POU

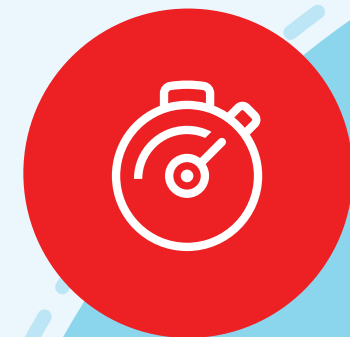

In procedural areas, an integrated point-of-use (POU) system within a single supply chain platform improves item-level track and traceability and case costing accuracy.

Tecsys' Elite™ Healthcare POU simplifies documentation and data capture with innovative technologies, reducing workflow disruptions, capturing supply usage and eliminating double entry processes.

1

## Get time back for patient care

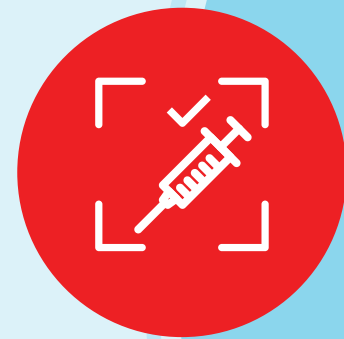

With a streamlined documentation process and reduced picking time, nurses have more time to focus on patient care.

2

## Gained efficiency

Nurses can get ahead of schedule with quick turnover time between cases with the help of efficient systems and scanning capabilities.

3

## Documentation made easy

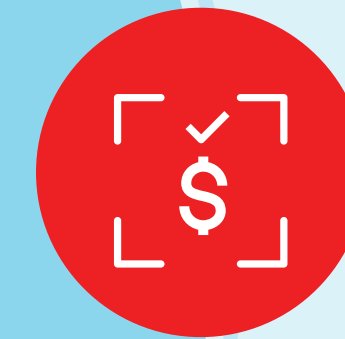

Simplify tissue tracking and chain of custody with effective data input and analytic tools.

## Preference card accuracy

Optimize inventory levels and strengthen demand assessments with accurate physician preference cards.

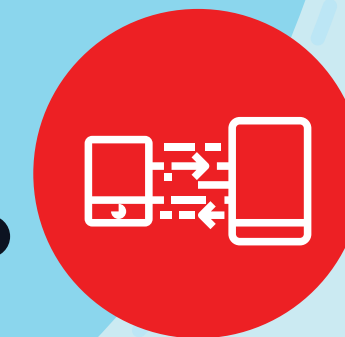

4

## Manage cost per case

Easily compare product prices and document the cost per procedure and per physician.

5

## Break down silos

Significantly improve the OR and supply chain relationship through a connected and centralized health system platform.
