

Why Healthcare Providers are Feeling the Stress of the COVID-19 Immunization Rollout?

The Challenge

Fully Manage the Variables of Vaccination Planning, Products, Regulations and Destinations

Documentation

Are you really going to manually set up every patient in your EMR for immunization records?

Inventory

The CDC sends your organization 10,000 doses and 2,000 doses are administered. Do you know where the remaining 8,000 doses are located?

Workflows

How is your organization going to handle 4,000 people needing to be vaccinated in a day – and potentially in a stadium/parking lot environment?

The Solution

Build Operational Resiliency for the Greatest Immunization Initiative of Our Time

At Tecsys, we have proven and robust emergency management supply chain solutions. Our COVID-19 vaccine tracking solution was designed specifically to meet CDC requirements and ensures you effectively, efficiently and reliably manage the distribution and administration of the vaccine in your communities.

Visible

Obtain accurate visibility of vaccine receipts and allocations to achieve end-to-end traceability and decrease the risk of letting doses go unused.

Simple

Record vaccine administration with an easy-to-use single scan that populates multiple applications with pertinent information such as lot, expiry and vaccine type to reduce the risk of erroneous manual input.

Scalable

Handle capacity and accelerate inoculations without putting stress on your current infrastructure.
